expected by the receiving system. PAF and other products that handle one name only may drop the preferred name under this arrangement.  
~~GEDCOM 5.4 and prior 5.x drafts specified that multiple names should be listed with the preferred name first. PAF and other products that handle one name only would drop the preferred name under this arrangement. Therefore GEDCOM 5.5 specifies that the preferred instance of multi valued information is to be listed last.~~
